QGIS Application - Bug report #10835
Can't toggle layer visibility in canvas when selecting multiple layers.

2014-07-07 10:34 AM - Donovan Cameron

Status:	Closed		
Priority:	Severe/Regression		
Assignee:	Jürgen Fischer		
Category:	Map Legend		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19209

Description

In 2.2 I was able to select multiple layers in the table of contents using shift or ctrl, then click on a single checkbox to turn off or on the visibility of those layers.

Looks like this isn't working for 2.4 anymore and makes it a pain to turn off or on 1 layer at a time.

Not sure if this is a bug or should be a feature request.

- Priority changed from Normal to Severe/Regression

I would say it is a regression.

Martin any ideas on this one?

#3 - 2014-09-14 03:41 AM - Martin Dobias

I would suggest adding functionality to check/uncheck multiple layers to the newly added visibility button within layers toolbar. It already contains buttons to show/hide all layers, so it could have two more items to show/hide selected layers.

I don't really like the previously used behaviour as it was non-standard.

#4 - 2014-10-03 05:08 AM - Giovanni Manghi

- Affected QGIS version changed from 2.4.0 to master

seems reasonable to me.
