

QGIS Application - Bug report #10855

"Expand all" and "Collapse all" disappeared from context menu in the Layers window

2014-07-09 05:13 AM - Bruno Chatenoux

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category: Map Legend	
Affected QGIS version: 2.4.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 19226
Description	
<p>I do not know if it is a bug or a decision made, but these functions are really needed back for projects with numerous layers.</p> <p>Thanks thousand time for your great job, Bruno</p>

- Operating System deleted (Windows)
- Priority changed from *Normal* to *Severe/Regression*
- Category set to *Map Legend*
- OS version deleted (7)

#2 - 2014-08-30 01:38 AM - Jürgen Fischer

- Subject changed from *"Expand all" and "Collapse all" disappeared from context menu in the Layers window* to *"Expand all" and "Collapse all" disappeared from context menu in the Layers window*

#3 - 2014-09-27 11:11 PM - Nathan Woodrow

- Status changed from *Open* to *Closed*
- Resolution set to *fixed/implemented*

These buttons now live in the toolbar for the legend so they are easier to get to.
