

QGIS Application - Feature request #10859

FeatureForm and init scripts: widgets should have objectName

2014-07-10 01:22 AM - Andreas Neumann

Status: Closed	
Priority: Normal	
Assignee:	
Category: Forms	
Pull Request or Patch Supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 19228
Description	
<p>The use case is that in a Python Init Script (layer properties, fields tab) I want to address a specific widget and change its value. I would like to use <code>dialog.findChild()</code> or <code>dialog.findChildren()</code></p> <p>In the case of the standard attribute form or drag and drop feature form all the widgets do not have objectNames corresponding with the field names.</p>
