QGIS Application - Bug report #10873
Select by location: does not work as expected

2014-07-11 12:37 AM - Filipe Dias

Status:	Closed			
Priority:	Normal			
Assignee:	Victor Olaya			
Category:	Processing/Core			
Affected QGIS version:	2.4.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19241	

Description

The option "adding to current selection" does not work.

Also "create new selection" does not work if there is already a selection.

- Subject changed from Select by location: "adding to current selection" does not work to Select by location: does not work as expected

#3 - 2014-09-14 04:51 AM - Alexander Bruy

This is because Processing considers existing selection in input layers. If there is a selection, only this selected features will be processed.

Possible workaround for this — forcing selection removal inside algorithm, so this algorithm will clear selection before processing.

#4 - 2014-09-14 12:22 PM - Victor Olaya

That seems to be a design error in the algorithm. These selection algs should not use only the selction, but the whole layer
