

QGIS Application - Bug report #10895

Fields won't Save

2014-07-15 01:44 PM - Rebecca Madden

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Digitising	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 19260
Description		
<p>After I draw a field into the Farm Fields layer of QGIS, I try to save changes to toggle editing, and the field disappears. Sometimes it shows up later, sometimes not. And sometimes it shows up in the wrong location, sometimes with the wrong label on it. Sometimes it is visible in the attributes table, but not on the map. I'm wondering what I can do to fix this problem, or if it is an issue within the system.</p> <p>Thanks!</p>

Is this about agricultural fields? So you have a polygon layer and you digitize new features and they behave strangely?

My coworker actually figured it out, but thank you for trying to help us out! I appreciate it!
