

QGIS Application - Bug report #10897

Openlayer plugin not appearing when reinstalled in 2.4.

2014-07-15 07:09 PM - Margaret Willis

<b>Status:</b>	Rejected	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Borys Jurgiel	
<b>Category:</b>	Plugin Manager	
<b>Affected QGIS version:</b>	2.4.0	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 19262
<b>Description</b>		
<p>I understand that the Openlayer plugin is auto loaded with 2.4.</p> <p>Unfortunately I accidentally removed this plugin in order to reload it when it crashed my system.</p> <p>I have been able to install it again but the dropdown icon refuses to show in the plugin box meaning I still can't access it.</p> <p>I presume this may be because the openlayers plugin is still being fixed for 2.4 but I have this issue was closed off in some commentary???</p> <p>Any help most appreciated.</p>

- Resolution set to invalid
- Status changed from Open to Rejected

The plugin is installed under the Web menu.

Tickets against the plugin should be opened on the relative bugtracker, not here.

Thanks.
