QGIS Application - Bug report #10924
Layers can't be reordered in Chugiak

2014-07-22 03:04 AM - Jerry Magnin

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Legend		
Affected QGIS version:	2.4.0	**Regression?:**	No
Operating System:	Debian GNU/Linux	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	invalid
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19284

Description

Hello world !
Since QGIS 2.4, moving layers in layers window/panel (to group them or change render) by a simple drag and drop is not possible anymore. Is it a bug ?

Thanks,

Jerry

- Resolution set to invalid

- Status changed from Open to Closed

Of course it is possible :)

I'm closing this ticket because I'm assuming it can be a local issue or that you are doing it wrong (as TOC changed slightly in QGIS 2.4).

Does it happens just on your Debian installation? Can you test another OS/Desktop manager?

In general is better to ask questions in the users/developers mailing list, and file a ticket when (almost) sure you have find a bug.

cheers!

Sorry for the mistake.
I tried on my Mint after upgrading to QGIS 1.4, and it worked. I rebooted on Debian, and now it works… I don't understant everything, maybe rebooting the system was necessary, but the most important is that it works!

Thanks.
