

QGIS Application - Bug report #10932

qgis not parsing pg_service.conf properly

2014-07-23 05:41 AM - Gavin Fleming

Status: Closed	
Priority: Normal	
Assignee:	
Category: Data Provider	
Affected QGIS version: 2.4.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 19290
Description	
<p>I have set up .pg_service.conf for several users on a network. It is working fine on Linux clients and some Windows clients.</p> <p>But on several Windows clients I get the attached error when connecting to the service.</p> <p>On these machines the same connection works fine in QGIS browser but gives this error in QGIS desktop. I have experimented with unix vs windows line endings and different string quotes for the parameters but QGIS seems to add a space to one or more of the parameters no matter what I try.</p> <p>QGIS 2.4 in all cases.</p>

- Category changed from Data Provider to Data Provider/PostGIS
- Resolution set to up/downstream
- Status changed from Open to Closed

qgis isn't parsing .pg_service.conf, but libpq does. So this might be a packing problem in osgeo4w

#3 - 2014-07-24 02:55 AM - Gavin Fleming

- Category changed from Data Provider/PostGIS to Data Provider
- Resolution deleted (up/downstream)
- Assignee deleted (Jürgen Fischer)

how do you account for it working in qgis browser but not in qgis desktop using the same osgeo4w install on the same machine?

#4 - 2014-08-20 01:55 PM - Jürgen Fischer

The blank in "gis" was a hint. libpq apparently expects the file to have unix style line endings (ie. only LF instead of CRLF).
