Affected QGIS version:	2.4.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	19329

Description

When using Batch processing with any model to process several files at once, there is an autofill option based on input parameter filenames.
When using this option, the last letter of the input filename is deleted when added to the root filename.
This affects only 2.4 since on 2.2 it works properly.
