Affected QGIS version:	2.4.0	**Regression?:**	No
Operating System:	linux windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	19364

Description

Hi,

this is my first try to report a "bug", hope i'm doing ok:

opening a QGIS project where a GRASS vector was saved in the QGIS layers panel,
but the GRASS database is actually missing (say you moved it to another folder),
you get QGIS to crash immediately.
This does not happens with rasters.

thanks, Roy.
