

QGIS Application - Bug report #11058

composer items panel: allow for stack re-ordering by drag'n dropping items

2014-08-14 07:23 PM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	Low	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 19392
Description		
It would be very useful to be able to modify the items' stack ordering by via drag'n dropping items in the items panel' list. In addition to drag'n drop operation, it would be useful (for touch-based interface) to have a toolbar below the list to do such operations. See attached screenshot of what GIMP does.
