Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19394	

Description

On windows platform (using the default QT Plastique style/theme), the new color picker widget (thanks Nyall, fantastic job!) doesn't play well with the UI. It's often vertically misaligned (see attached screenshot for one of the worse of such misalignment), and its height is excessively tall when compared to other widgets (drop-down list, buttons, etc.).

Before the release of QGIS 2.6, I think it'd good for one QT GUI guru to have a look at this and try to improve things so QGIS looks acceptable on windows.

(Filling this as per a discussion with Nyall)

I can't reproduce it with Windows 7. I tried with different styles, different font sizes, but it is always correctly aligned.

Leyan, screenshot?

#3 - 2014-09-27 10:29 PM - Nyall Dawson

- Status changed from Open to Feedback

Mathieu - this can be closed now, right?

#4 - 2014-09-27 11:47 PM - Mathieu Pellerin - nIRV

- Resolution set to fixed/implemented

- % Done changed from 0 to 100

- Status changed from Feedback to Closed

absolutely
