<b>Description</b>	
<p>According to the GDAL docs (<a href="http://www.gdal.org/gdalbuildvrt.html">http://www.gdal.org/gdalbuildvrt.html</a>) srcnodata parameter of gdalbuildvrt should accept space separated values for multiple bands, just like wrap command does. In fact in QGIS multiple values (space separated) can be entered in "No data values" field in Wrap (Reproject) command.</p>
