

QGIS Application - Feature request #11072

Posibility to create a map similar with maposmatic with street index and multiple grids

2014-08-19 12:57 AM - baditaflorin -

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Pull Request or Patch supplied:	Resolution: invalid
Easy fix?: No	Copied to github as #: 19406
Description	
<p>I need to create for the fire department in Ramnicu Sarat a map that will show all the streets, house numbers, number of lanes, oneway street, etc</p> <p>I did all of this, but i cannot make the split in grids, and then generate a index of all the streets, showing that the street victoria is in grid A1,B2, street Calarasi is in D5, etc</p> <p>And the same for the POI</p> <p>This will be useful for them to be able to search fast for a address</p> <p>They will have this map printed on a 2 by 2 meters canvas</p> <p>I did the grids with mmqgis > Create Grid Layer > Rectangle (Polygon)</p> <p>But now i don`t know how i can interrogate the database to search for Roads that are inside of each grid, and then make a list out of them</p>
