<b>Pull Request or Patch supplied:</b>	Not supplied	
<b>Easy fix?:</b>	No	
<b>Description</b>		
<p>I have several users which complains about the current state of the layers panel. They feel that it is difficult to control how to move a layer in the layers panel.</p> <p>When I move a layer ontop of another layers name/text, it will be dropped below that layer.</p> <p>When I move a layer ontop of a group, it will be dropped into that group.</p> <p>When I move a layer ontop of another layers styling, nothing will happen.</p> <p>I think it would be much easier/more intuitive to drag and drop layers if dropping on the styling of a layer will make the dragged layer drop below that layer.</p>
