

# QGIS Application - Bug report #11092

## Saving vector layer with empty name might be forbidden

2014-08-25 01:32 AM - Harrissou Santanna

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Affected QGIS version:</b> 2.4.0	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 19425
<b>Description</b>	
<p>Open a project Add a vector layer Right-click &gt; Save as 1/ choose output format as MID/MIF for e.g.. Don't choose output name nor directory and save. You got a successfull message bar. if u had checked "add to map canvas", then you got a warning message bar concerning the incompatibility of the file format. 2/ Choose SHP for the file format and without filling a name, save. You get the same successfull message bar but if you had checked "add to map canvas", QGIS crashes.</p> <p>When saving a raster layer, the ok button is greyed till you fill the file name. This should be used for vector layer, too, I think.</p>	

### Associated revisions

#### Revision acf1f70f - 2014-08-30 09:03 AM - Jürgen Fischer

Fix #11092:

- fix crash when invalid shapefile layer is repacked
- error out if vector file writer is invoke with an empty filename
- don't allow "Save as..." without a given filename
