QGIS Application - Bug report #11094
Loading simple SQL-Server table not possible

2014-08-25 02:07 AM - Filip Mahieu

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Data Provider/MSSQL			
Affected QGIS version:	2.4.0	**Regression?:**	No	
Operating System:	XP	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:		**Copied to github as #:**	19427	

Description

When trying to add certain simple SQL Server-tables in 2.4, like one as added file, QGis tells me it is an invalid layer.

In 2.2 this is not a problem.

Is GWP unique?

Make sure it is, or at least add a int primary key column with IDENTITY. QGIS 2.4 requires there to be a unique column it can use as a key. In 2.2 this wasn't enforced but caused issues inside QGIS so I made it enforce in 2.4.

- Status changed from Feedback to Closed

Ok, this seems to solve the issue.

Thanx!
