

## QGIS Application - Bug report #11109

### Project path for embedded groups/layers saved in absolute instead of relative

2014-08-27 08:42 AM - Michael Douchin

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b> Project Loading/Saving	
<b>Affected QGIS version:</b> 2.4.0	<b>Regression?:</b> No
<b>Operating System:</b> Ubuntu	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> Yes	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 19439

#### Description

To reproduce :

- Create a "parent" project
- add some groups, sub-groups and layers
- save
- create a "son" project
- embed layers or groups from the "parent" project
- save son project

The path to the parent project is saved as absolute, and not relative.

This is a nasty bug which prevents users to use embedded groups and layers in QGIS Server.

See 2 examples projects "son" and "parent" attached with example data.

I am using QGIS 2.4 under Ubuntu, but users reported the same issue with Windows.
