

QGIS Application - Bug report #11119

Wrong scale display

2014-08-29 03:45 AM - marco donato

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 19448
Description		
<p>Hello, I've recently installed QGIS 2.4 on Windows 7 (64bit). Before installing, I disintalled the previous version and also deleted the "C:\\Users\\.... username... \\qgis2 folder.</p> <p>QGIS is working but I have a bug with the Scale Box: when I select for example scale 1:100,000 the resulting scale after clicking is 1:90,279. The same apply for any other scale provided in the dropdown list and also if I type a custom scale (e.g: I've just typed 1:15000 resulting in 1:11,284).</p> <p>Many thanks.</p> <p>ragards, Marco</p>

Reinstalled QGIS.... now it's working.

Bye

#2 - 2014-10-04 08:53 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed
