Description				
A user reported a To reproduce :	bug during edition of an attribute ta	able under QGIS2.4.		
To reproduce :		able under QGIS2.4. mple "foo") and add it in the current p	project	
To reproduce : - create a vecto	or layer with one "text" field (for exa		•	
To reproduce : - create a vecto - open layer pro	or layer with one "text" field (for exa	mple "foo") and add it in the current p 'multiline" property of the "Text edit" f	•	
To reproduce : - create a vector - open layer pro- - create 2 feature	or layer with one "text" field (for exa operties / Field tab, and check the '	mple "foo") and add it in the current p 'multiline" property of the "Text edit" f	•	
To reproduce : - create a vector - open layer pro- - create 2 feator - save layer set	or layer with one "text" field (for exa operties / Field tab, and check the ' ires with some content in the "foo" f	mple "foo") and add it in the current p 'multiline" property of the "Text edit" f ïeld	•	
To reproduce : - create a vecto - open layer pro - create 2 featu - save layer see - open attribute	or layer with one "text" field (for exa operties / Field tab, and check the ' ares with some content in the "foo" f ssion and deactivate edition	mple "foo") and add it in the current p 'multiline" property of the "Text edit" f ield e Form view	•	
To reproduce : - create a vector - open layer pro- - create 2 feator - save layer ses - open attributer - click on one o	or layer with one "text" field (for exa operties / Field tab, and check the ' ires with some content in the "foo" f ssion and deactivate edition e table, activate edition, toggle to th	mple "foo") and add it in the current p 'multiline" property of the "Text edit" f ield e Form view e label changes into NULL	•	
To reproduce : - create a vecto - open layer pro - create 2 featu - save layer see - open attribute - click on one o - click on anoth	or layer with one "text" field (for exa operties / Field tab, and check the ' ares with some content in the "foo" f assion and deactivate edition table, activate edition, toggle to th f the line in the left panel -> the line are line in the left panel -> same bef	mple "foo") and add it in the current p 'multiline" property of the "Text edit" f ield e Form view e label changes into NULL	or the field "foo"	

## History

## #1 - 2014-09-02 08:38 AM - Matthias Kuhn

- Status changed from Open to Feedback

Not reproducible on recent master. Did you try with a nightly?

## #2 - 2014-09-02 08:48 AM - Michael Douchin

- Target version deleted (Version 2.6)
- Priority changed from Severe/Regression to Low
- Status changed from Feedback to Closed

I just tested with last master, and I cannot reproduce the issue. Let's close it !

Sorry for the noise, I should have done it before opening this issue.
