

QGIS Application - Bug report #11142

Adding three shapefile layers when I add just one for QGIS 2.4.0

2014-09-04 01:26 PM - Mathieu Noble

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Map Canvas	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 19470
Description		
<p>Hey,</p> <p>When I add a shapefile vector layer to my map, it adds three copies instead of just one. Why is that? I'm using QGIS 2.4.0 for 32 bit Windows 7 home premium.</p> <p>Thanks!</p>

How do you add the shape? using the "add vector" dialog? using the qgis browser? using drag and drop? it happens with any shapefile? If no, then attach a sample dataset to allow us replicate? Anyway it seems a local issue, as of course this is not the normal behavior.
