

QGIS Application - Bug report #11168
Cannot remove expression fields (crash)

2014-09-09 05:00 AM - Martin Dobias

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Matthias Kuhn	
Category:	Vectors	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 19482
Description		
<p>After having added an expression field to a vector layer, I am unable to remove it. Clicking "delete column" crashes QGIS because it is trying to remove a field from edit buffer which does not exist.</p> <p>Also, would it be possible to update the GUI somehow so that users do not need to enter editing mode in order to add expression field? It is not bound to the editing mode anyway...</p>

Hi Martin,

The following pull request solves the issue here as well as it integrates it with editing mode/undo (waiting for your review for the second part).

<https://github.com/qgis/QGIS/pull/1515>

Oh... what a coincidence :-)

Sorry - I am sometimes a bit loosing track of the pull requests... I will try to have a look at it this week.
