

QGIS Application - Bug report #11177

hot keys configuration problem

2014-09-10 04:43 AM - Michal Baran

Status: Closed	
Priority: Normal	
Assignee:	
Category: Browser	
Affected QGIS version: 2.4.0	Regression?: No
Operating System: Win 8.1	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: end of life
Crashes QGIS or corrupts data: No	Copied to github as #: 19491

Description

1. In previous versions of QGIS it was OK, but in ver. 2.4 I can't permanent change hot keys profile :(I have prepared list of using by me hotkeys (in xml format) and I must manually correct this properties every time after reboot/restart QGIS.
For example, I using F5 key for rectangle marking any elements, but in 2.4 version this keys is default assign to refresh command. In menu Settings/Configure shortcuts dialog window I see F5 at 'Refersh' (default) and at 'rectangle mark' (by me). I can use mark command only when delete first case.

2. Is it possible use any hotkey for turn on/off visible Layers panel?

Best regards
