QGIS Application - Bug report #11198
Text annotations are not rendered when saving the map canvas as image

2014-09-12 10:52 PM - Mathieu Pellerin - nIRV

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Map Canvas			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:		**Copied to github as #:**	19509	

Description

Text (and other types of) annotations are not rendered when saving the map canvas as an image through QGIS' Project -> Save as Image... menu item.

Steps to reproduce:
1. Create a new project
2. Add a dataset layer (doesn't really matter what you use here)
3. Add a Text Annotation on the canvas
4. Save the canvas as an image via the Project -> Save as Image... menu item
5. Open the saved image, notice the absence of the text annotation

Flagging as blocker, it's a real bummer.

Is this a regression or more of a nice to have if it works?

#2 - 2014-09-27 11:53 PM - Mathieu Pellerin - nIRV

Nathan, my memory remembers a time when I could Save as Image... with annotation drawn, but then again I could be wrong. I was discussing this with Martin, it might have regressed after the MTR mega-commit.

I will try to test this out on QGIS 2.0 or 2.2 to confirm it is indeed a regression and my memory's still somewhat trustworthy ;).

#3 - 2014-09-27 11:55 PM - Nathan Woodrow

Maybe you have just gone mad ;)

Nah I might be a regression from the multi threading stuff. Should be easy enough to fix if it was.

#4 - 2014-10-03 10:17 AM - Giovanni Manghi

- Priority changed from Severe/Regression to Normal

I tested qgis down to 1.8 and it never exported the annotation with "save as image". Not even sure we should make this a feature request or not.

#5 - 2016-05-18 02:40 AM - Arnaud Morvan

This feature has been added by https://github.com/qgis/QGIS/pull/3059
