

QGIS Application - Bug report #11208

QGIS 2.4 cannot save MSSQL spatial layer

2014-09-15 01:03 PM - Binod Adhikari

Status: Closed	
Priority: High	
Assignee: Tamas Szekeres	
Category: Data Provider/MSSQL	
Affected QGIS version: 2.4.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 19518
Description	
Recently I upgraded to QGIS 2.4 and noticed that it cannot save edits that were done to MSSQL spatial data layer. I didn't have this issue with QGIS 2.2. Seems like others are also having similar issue with MSSQL spatial data with the new version of QGIS- https://gis.stackexchange.com/questions/113635/broken-mssql-provider-in-recent-qgis-versions-has-anyone-experienced-this?newreg=93db453af0e4e6c9924fb225c1ec394
