

QGIS Application - Bug report #11225

Processing tools don't work without opening the configuration

2014-09-18 06:41 AM - Howard Frederick

Status:	Closed	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/Core	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:	OS X	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 19534
Description		
<p>Scripts, GRASS and R scripts don't run after QGIS is first opened. Scripts give an error when run:</p> <p>Algorithm Regular sampling grid starting...</p> <p>coercing to Unicode: need string or buffer, QPyNullVariant found See log for more details</p> <p>GRASS claims missing dependencies.</p> <p>Both of these are fixed by opening Processing Options and configuration and interacting with any of the options - toggling scripts as a provider, opening and checking the GRASS folder. Afterwards all the functions work.</p>		

History

#1 - 2014-11-08 12:11 AM - Howard Frederick

This problem no longer occurs in 2.6.

#2 - 2014-11-08 12:23 AM - Paolo Cavallini

- Resolution set to fixed/implemented
- Status changed from Open to Closed

#3 - 2015-06-07 04:33 AM - Giovanni Manghi

- Category changed from 94 to Processing/Core
