

QGIS Application - Bug report #11282

Font Marker symbol value 0x 173 (Unicode 00AD) not displaying in all fonts

2014-09-27 06:34 AM - Richard Hartley

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 19578
Description		
Font Marker symbol value 0x 173 (Unicode 00AD) not displaying in all fonts. This means a font marker symbol using this character cannot be created. Screenshots and examples attached.		

History

#1 - 2014-10-04 10:04 AM - Giovanni Manghi

- Category changed from Symbology to GUI
- Affected QGIS version changed from 2.4.0 to master
- OS version deleted (8.1)
- Operating System deleted (Windows)
- Priority changed from Normal to Low

#2 - 2016-03-04 06:57 AM - Richard Hartley

Would it be possible to provide an update on this bug? It is affecting approximately 5500 users within the humanitarian community, who are using the OCHA Humanitarian Icons.

Many thanks.

#3 - 2016-03-14 07:31 PM - Nyal Dawson

I think it's an issue with the font itself. 0xAD is not a printable character, I can't get that character to display in any program on linux.

#4 - 2016-10-09 09:19 PM - Nyal Dawson

- Status changed from Open to Closed
- Resolution set to invalid
