

QGIS Application - Bug report #11313

Bad integer variables in postgis providers. Need unsigned int 0-4294967295

2014-10-02 11:12 PM - Alexander Novoselov

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider/PostGIS	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 19609
Description		
<p>In the long-lived database Postgresql, and an increase in counter OID 2147483647 overflow occurs above variables, using this OID. As a result, does not create a binary cursor, and work with a layer of broken. Geometry are displayed correctly, but the fields are not defined. Table attributes layer - ERROR.</p> <p>Search problem should be visible here src/providers/postgres. Many of the variables passed to the function int.</p> <p>Need unsigned int 0-4294967295!!!</p>		

History

#1 - 2017-03-06 03:10 PM - Giovanni Manghi

- Target version deleted (Future Release - High Priority)
- Priority changed from High to Normal

#2 - 2017-05-01 01:08 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#3 - 2017-09-08 01:35 PM - Jürgen Fischer

- Assignee deleted (Jürgen Fischer)

#4 - 2019-03-09 03:12 PM - Giovanni Manghi

- Status changed from Open to Closed
- Resolution set to end of life

End of life notice: QGIS 2.18 LTR
