

QGIS Application - Bug report #11334

Shapefile attributes scrambled

2014-10-05 09:03 PM - Frank Hebbert

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Affected QGIS version: 2.0.1	Regression?: No
Operating System: Mac	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: worksforme
Crashes QGIS or corrupts data: No	Copied to github as #: 19628
Description	
<p>I have a polygon shapefile with ~50 fields. After a calculation, the fields are 'scrambled', with values in the wrong fields, but not in a consistent way. No warnings or crash.</p> <p>See attached screenshot -- e.g. in the first row, "29 Eastern Parkway" should all be in the address field.</p> <p>Saving to geojson doesn't resolve the scrambling. Seems to have been permanently re-organized.</p>	

History

#1 - 2014-10-06 02:18 PM - Matthias Kuhn

Do you still have the original (uncorrupted) data? Is this reproducible? How?

#2 - 2014-10-06 02:18 PM - Matthias Kuhn

- Status changed from Open to Feedback

#3 - 2014-10-26 03:15 PM - Jürgen Fischer

- Resolution set to worksforme

- Status changed from Feedback to Closed

closing for the lack of feedback.
