QGIS Application - Bug report #11334
Shapefile attributes scrambled

2014-10-05 09:03 PM - Frank Hebbert

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:				
Affected QGIS version:	2.0.1		**Regression?:**	No
Operating System:	Mac		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	worksforme
Crashes QGIS or corrupts data:	Yes		**Copied to github as #:**	19628

Description

I have a polygon shapefile with ~50 fields. After a calculation, the fields are 'scrambled', with values in the wrong fields, but not in a consistent way. No warnings or crash.

See attached screenshot -- e.g. in the first row, "29 Eastern Parkway" should all be in the address field.

Saving to geojson doesn't resolve the scrambling. Seems to have been permanently re-organized.

History

Do you still have the original (uncorrupted) data? Is this reproducible? How?

#2 - 2014-10-06 02:18 PM - Matthias Kuhn

- *Status changed from Open to Feedback*

#3 - 2014-10-26 03:15 PM - Jürgen Fischer

- *Resolution set to worksforme*

- *Status changed from Feedback to Closed*

closing for the lack of feedback.
