Revision 4ea5c809 - 2014-10-15 11:17 AM - Nyall Dawson

[composer] Avoid crash when using redo on multiframe (fix #11351)

Since multiframe changes can remove and create new frame items,

it's not safe to directly manipulate frame items in

QgsComposerItemCommand. Now, commands which apply to a frame always

fetch a reference to the correct frame item directly from the

parent multiframe. Also added unit tests for this crash.

History

#1 - 2014-10-08 07:35 AM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from No to Yes

- Priority changed from Normal to High

#2 - 2014-10-15 02:18 AM - Nyall Dawson

- Status changed from Open to Closed

Fixed in changeset commit:"4ea5c8094851f9f71c0af2d9dde8eebc879dedb2".
