Category:	DB Manager		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	19646

Description

Launch QGIS Master

Open DB Manager Dialog

Connect to a database.

If your connection succeeds, DB Manager is no longer foreground. You need to search and put it foreground before choosing your data. It's not really a big issue but I mentionned it as "blocker" because it's not the way it worked before, even in 2.4. It remained foreground till you choose to go back to another dialog. And this behaviour is better IMHO.
