QGIS Application - Bug report #11415
Not possible to delete and type in values into float spinboxes

2014-10-15 10:35 AM - marisn -

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19692	

Description

For some reason many floating point number spin boxes use some kind of "padding" events - it is not possible to delete and enter other value by hand, as it constantly gets padded to specified formatting.

Steps to reproduce:

Open a print composer;

Add any element;

Open element properties and choose "Position and Size";

Try to position element at coordinates X: 21.319 Y: 7.503

Observe how clever editing technique has to be used to enter value.

History
