**Description**

In Print Composer, if a legend is using filter my map content try to edit one of the legend elements might lead to undesired results. This is true for both editing the table, deleting legend items or reordering it.

In the images below I have tried to change a item "RECOLTE" name to "RECOLTE_2", and as you can see it changes another item instead. I believe this is something to do with the legend item index, since the item I was trying to edit is in the third line when the legend is filtered, and the edited item is in the same position when the legend is not filtered.

To replicate, create a categorized view of any layer and create a map with it. Filter legend to map content and zoom to an area where some categories are filtered. Now try to edit labels, delete items or reorder them.

**Associated revisions**

Revision c7204cc7 - 2016-01-27 05:51 AM - Nyall Dawson

Fix editing composer legend titles while filtering enabled (fix #11459)

**History**

#1 - 2014-10-21 09:25 AM - Alexandre Neto

Forgot to say that I was using QGIS 2.5 962a7d9. So changes might have been done in the meanwhile.

#2 - 2014-10-21 09:15 PM - Martin Dobias

- Priority changed from Severe/Regression to High

Lowering priority as this is not a blocker (editing works when filtering is turned off)

#3 - 2014-10-31 05:55 AM - Jürgen Fischer

- Target version changed from Version 2.6 to Future Release - High Priority

#4 - 2015-02-13 11:14 PM - Lene Fischer

Same issue in 2.6.1
When I edit a filtered version of the legend, is act as if it is unfiltered

Having a list with 4 posts
Filtering and now see post 1 and 4 - viewing only 2 posts
Try to edit post 4 - nothing change
Unfilter and post no. 2 has the changes.
See video http://screencast.com/t/okfw52a8m

#5 - 2016-01-26 08:58 PM - Nyall Dawson
- Status changed from Open to Closed

Fixed in changeset commit:"c7204cc72285489461722fd5c1669310ac53edc7".
