Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19747

Description

Oh, this must be fixed before the release of 2.6: drag n drop of items in the qgis main canvas' layers panel is broken.

Steps to reproduce:

1. Create a new project
2. Add two layers (of different name, so issue is easy to spot)
3. Try to drag the first layer below the second layer
4. The drag indicator shows, but when the mouse button is released, the item isn't moved
