QGIS Application - Bug report #11488
crash using qgis/processing field calculator

2014-10-24 03:39 AM - Lorenzo Luisi

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Processing/QGIS			
Affected QGIS version:	2.4.0	**Regression?:**	No	
Operating System:	windows 7	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	19758	

Description

Hi,

if make this formula:

processing.runalg("qgis:fieldcalculator","C:/Papi/Corsi QGIS
(eCAD)/22-24oct2014Faunalia/analisi_qgis_corso/processing/vector_calculator/census_boundaries.shp","msf",0,10,3,True," "MALES" /
 "FEMALES" ","")

then I go in crash

why?

[processing] fix Field calculator algorthm (fix #11488)

History

#1 - 2014-10-24 07:12 AM - Giovanni Manghi

- *Crashes QGIS or corrupts data changed from No to Yes*

- *Subject changed from Field calculator VS calcolatore campi to crash using qgis/processing field calculator*

- *Category changed from Browser to 94*

- *Status changed from Open to Feedback*

- *Target version deleted (2.5)*

Please attach all the files of the shapefile, just the dbf in not enough.

It would be better also to know that formula did you used, and all the other possible details (a screenshot would help).

It is qgis that crashes, or you just get an error running the operation/formula?

Please also use more meaningful subjects and choose the appropriate category (if in doubt leave blank).

cheers

- File vector_calculator.zip added

Here the data. However, the problem seems rather general. Please note that on Linux it works fine.
