QGIS Application - Bug report #11493
DXF load: when loading files, use the name of the file in the legend

2014-10-24 07:24 AM - Asier Sarasua

Status:	Closed			
Priority:	Low			
Assignee:				
Category:	Map Legend			
Affected QGIS version:	2.4.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	19763

Description

When adding a DXF file to a project, QGIS uses meaningless names like "entities LineString".

It would be more useful to have names like "filename"+"geometry type". For instance, if I load a DXF file called "137-30CIIC.dxf", use "137-30CIIC LineString"

History

#1 - 2017-05-01 01:07 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#2 - 2019-01-26 10:02 PM - Jürgen Fischer

- Resolution set to fixed/implemented

- Status changed from Open to Closed

- Description updated
