<b>Category:</b> Processing/GUI	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 19766
<b>Description</b>	
When running a lot of different analysis, the list of recently used algorithms gets really big, so it would be nice to be able to remove it.

I don't understand. The list of recently used algorithms is limited to 5. If you run more, the old references are not shown, only the 5 latest ones. Isn't that what happens in your system?

I just upgraded QGIS and no longer replicate this. Probably a local problem.
