

QGIS Application - Bug report #11553
Georeferencer providing blank output

2014-11-04 01:00 PM - Andrew Jeffrey

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Rasters	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 19823
Description		
When creating an output from the georeferencer tool the output is blank - either solid black or solid white raster.		
Occurring with a number of different EPSG (28355, 4283, 4326).

If confirmed would be a bad regression of course, but I cannot, at least after a quick test trying to georeference a jpg image in wgs84.

Does the issue shows always regardless of the input file format? Can you attach a sample that does not work for you?
