

QGIS Application - Bug report #11626

PRJ sometimes ignored

2014-11-12 07:26 AM - William Kyngesburye

Status: Closed	
Priority: Normal	
Assignee:	
Category: Projection Support	
Affected QGIS version: 2.6.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: end of life
Crashes QGIS or corrupts data:	Copied to github as #: 19879
Description	
<p>Strange problem - when adding a shapefile to a project FOR THE FIRST TIME, the PRJ is often but not always ignored. If I then remove the shapefile, or quit QGIS, and add it again, the PRJ is read. All subsequent adding of that shapefile will read the PRJ.</p> <p>QGIS is not changing the shapefile or adding a QPJ file, and I couldn't find anything in my .qgis2 folder that keeps track of what has been opened, so it's very mysterious why only a first-time open doesn't work. Very frustrating when I'm rectifying dozens of images each with its own generated grid shapefile for the GCPs, I have to open each grid shapefile twice.</p>	

History

#1 - 2017-05-01 01:07 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#2 - 2019-03-09 03:12 PM - Giovanni Manghi

- Resolution set to end of life
- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
