Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 19888
Description		
<p>ogr2ogr can be used to merge several shapefiles. It would be useful to have an ogr2ogr based tool that merges several shapefiles stored in a folder. Here's an example code written by Darren Cope:</p> <pre>mkdir merged for %f in (*.shp) do ( if not exist merged\merged.shp ( ogr2ogr -f "esri shapefile" merged\merged.shp %f) else ( ogr2ogr -f "esri shapefile" -update -append merged\merged.shp %f -nln Merged ) )</pre> <p>Source: <a href="http://darrencope.com/2010/05/07/merge-a-directory-of-shapefiles-using-ogr/">http://darrencope.com/2010/05/07/merge-a-directory-of-shapefiles-using-ogr/</a></p>
