QGIS Application - Bug report #11643
SRID/ Primary key not populating with "Only look in meta data table" unchecked

2014-11-14 04:17 AM - Jonathan Moules

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Data Provider/Oracle			
Affected QGIS version:	2.6.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19896	

Description

To replicate:
- Connect to table with these checkboxes selected:
--"Only look for users tables", and "only look in meta data table".

I get 23 different selectable tables, all have a SRID correctly determined.

=============

- Now do the same again but use these options only:
- "Only look for users tables"

- I get NO results with SRID correctly determined. They all say "Enter SRID".

Problem is MDSYS.SDO_GEOM_METADATA_TABLE does have SRID's for all those tables. So actual metadata is being ignored when "Only look in meta data table" is disabled. Surely it should **start** by searching the metadata table getting all pertinent data, then look for all tables that are not in there if the checkbox is disabled?

QGIS 2.6
