Affected QGIS version:	2.6.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19900

Description

Hello,

I've found a bug that occurs only for custom forms: when I minimize the sub-form and maximize it afterwards (using collapseButton), the sub-form simply disappears (see linked images).

History

#1 - 2015-04-28 05:50 AM - Médéric RIBREUX

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Hello,

it seems that somebody has fixed the bug in QGIS 2.8.1: I can't reproduce it anymore...

Well thank you very much to the developper(s) that has(ve) fixed this !
