

QGIS Application - Bug report #11660

Custom CRS

2014-11-16 10:44 AM - Mark Brandon

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Affected QGIS version: 2.6.0	Regression?: No
Operating System: Mac OSX	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: worksforme
Crashes QGIS or corrupts data: No	Copied to github as #: 19911

Description

When using Settings > Custom CRS, the program returns the following error message:

The proj4 definition of '* Generated CRS ()' is not valid.

This result occurs regardless of the proj4 code. As a test case, I copied the crs for WGS84, and it gave the same error. The calculations work fine. I have attached a screen shot showing the error for the WGS84 example.

History

#1 - 2014-11-16 01:40 PM - Giovanni Manghi

- Status changed from Open to Feedback

cannot replicate on Linux and Windows, maybe is a OsX only thing.

#2 - 2015-01-10 07:13 AM - Jürgen Fischer

- Resolution set to worksforme

- Status changed from Feedback to Closed

closing for the lack of feedback
