| Easy fix?: No | Copied to github as #: 19912 |
| Description | |
| <p>For creating UTM maps I would like to only use the 5th and 4th last digit of the coordinates as label of the grid. (eg.: From 645000 -> 45 as label or 5501000 -> 01 as label) Is it possible to integrate such a function? I mean where you can select the displayed digits?</p> <p>Here you can see an example of labeling: underdark.files.wordpress.com/2013/03/printcomposer_grids.png</p> | |

It should be a feature request to add a Tool/Selection to do that ;)
