

QGIS Application - Bug report #11664

Locking selected items button in print composer freeze too much.

2014-11-16 10:42 PM - Seb Radzimski

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 19915
Description		
<p>Hi folks!</p> <p>I have a problem with print composer. In QGIS 2.6 locking selected items button completely freeze objects (maps, labels) so I can't change map scale or label text (it is impossible to choose/change locked items properties). In previous versions of QGIS 'lock selected items' button locked position of object on a 'sheet', but it was possible to choose other item and change its properties (scale, etc.). So this is why I am confused...is it right or wrong? Anyway how can I (in QGIS 2.6) lock object position without freezing all item properties?</p> <p>Regards!</p>		

History

- Resolution set to invalid
- Status changed from Open to Closed

A couple of things to note:

- While you can't select locked items in the composer canvas, you CAN select them using the "items panel" (choose View->Panels->Items if this isn't visible).
- Locked items can be individually unlocked via the items panel
- All locked items can be unlocked at once via the "Unlock all" toolbar button.

Hope that helps!

Thanks! Yes I know ... but for my users (usually 40-50 years old engineers) this change is impossible to understand ;)
So I see it is a feature - not a bug!
Cheers!

Yes - it definitely is a feature! The rationale is that it allows you to lock an item which is stacked above items (for instance, a rectangular border) and freely interact with the items below it. It's the standard behaviour for design programs, and very handy when you get the hang of it.

One more thing! I've noticed that on locked map item I can change scale or rotation but I can't use 'move map content' button. I understand the idea but possibility of locking positions of items on a sheet was very useful.

Regards.
