Status:	Closed			
Priority:	High			
Assignee:				
Category:				
Affected QGIS version:	2.6.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	19922	

Description

When removing layer which is in the print composer legend QGIS comes with "Access violation" window and makes impossible to continue.

History

#1 - 2014-11-17 11:54 PM - Miroslav Umlauf

"Access violation" happens at the moment when print composer is open (if is open then immediately). If composer is not open and I try save project after removing layer, QGIS crashes and also corrupt the project file so it can't be open anymore.

#2 - 2014-11-18 09:46 PM - Miroslav Umlauf

It seems it is only issue with legend created in version 2.4., if I create new legend in 2.6 it works as expected.
