

QGIS Application - Feature request #11730

Please support ISO servers

2014-11-25 05:14 AM - Tom Kralidis

Status:	Open	Resolution: Copied to github as #: 19965
Priority:	Normal	
Assignee:		
Category:	MetaSearch Catalogue Client	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
INSPIRE CSW geoportal [0] only returns ISO, not Dublin Core. While this might be a mistake, it would be important for MetaSearch to support (and perhaps add in the standard distribution) it.

It would be valuable to clarify what CSW ISO profile support would give to MetaSearch that we can't get from the CSW Core/baseline (i.e. Dublin Core).

If the driver is to support the INSPIRE CSW geoportal, I would say that this CSW needs fixing. A valid INSPIRE Discovery Service is required to base on CSW APISO, which is required to base on the CSW Core/baseline (i.e. Dublin Core).

#2 - 2015-08-21 04:57 AM - Tom Kralidis

- Project changed from 218 to QGIS Application

#3 - 2015-08-21 04:57 AM - Tom Kralidis

- Category set to MetaSearch Catalogue Client

#4 - 2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No
