- Target version deleted (Version 2.6)
- Assignee deleted (Benoit Pescher)
- Status changed from Open to Feedback
- Subject changed from crash to qgis crashes when editing the table of attributes.

is the (edited) title correct?

can you attach sample data?

have you tried removing/disabling all 3rd party plugin, restart qgis and try again?

Can you try also renaming the .qgis2 folder?

thanks.

- File diagnostic.dbf.tar.gz added

the new title is correct, thank you.

I tried disabling all 3rd party plugin and renaming the .qgis2 folder but the problem is the same.

You will find the shapefile in attachment

cannot confirm the crash, works fine here on qgis 2.6 and master on Ubuntu Linux and Windows.

does it works ok on systems other than yours?

- Status changed from Feedback to Closed

I don't try with an other system but I create a new shapefile and a new project and it works fine.
