

QGIS Application - Bug report #11747

refresh html button does nothing

2014-11-26 09:54 AM - Mar Tin

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:	windows 64 bit	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 19980
Description		
<p>Since updating from 2.4 to 2.6 the print composers "refresh html" button doesnt work anymore. Before I could easily e.g. change the font-size in my little html codes to make tables, and a click on refresh html would automatically update the html frame in the print composer. Now not even reloading the html file doesnt work. I have to delete the whole box, insert a new one and point it to the updated file.</p> <p>I'm attaching an example html table.</p>
